

## **PRESS RELEASE**

Tropical Islands - Europe's largest tropical holiday world

### **Company portrait (business)**

Tropical Islands is Europe's largest tropical holiday experience. The idea behind the project was to create an independent holiday destination and build a tropical island paradise in the heart of Europe. Here, in the largest self-supporting hall in the world, our guests can discover a unique holiday destination on a 66,000 m<sup>2</sup> site, whatever the weather. Tropical Islands is located in Brandenburg, Germany, just off the A13 motorway between Berlin and Dresden.

The investors behind Tropical Islands are the Tanjong public limited company, based in Malaysia, and Au Leisure Investments Pte Ltd., from Singapore. Tropical Islands opened in December 2004. Since then, Europe's largest tropical holiday experience has given guests the opportunity to enjoy "the best of the tropics" all year round, no matter what the weather. The largest indoor rainforest in the world, the "Tropical Sea", the "Bali Lagoon" and a Tropical Village are amongst the star locations, and other attractions include Germany's highest water slide, a huge children's play area and Europe's largest Tropical Sauna & Spa complex. Overnight stay offers are the only holiday accommodation of their kind, even offering guests the chance to sleep in the tropics. A number of comfortable tents await visitors in the Rainforest Camp, while our selection of lodges (standard, premium or designer) provides a more homely option. Further accommodation is on offer just outside the hall, including the Tropical Islands campsite and numerous holiday homes. And holiday apartments aren't far away, either.

It is the aim of Tropical Islands to become Europe's leading holiday resort. Our vast array of attractions and services are ideal for weekend breaks and family holidays, and we have everything you need for a healthy and relaxing stay. Just a few years after it opened, Tropical Islands has already become a recognised brand in Germany and abroad. 20% of our guests already come from outside of Germany, and this figure continues to grow.

We are constantly working to develop Tropical Islands further, becoming ever more attractive to guests, both nationally and internationally.
